

# Retrospective Observational Study of Atypical Winter Respiratory Illness Season Using Real-Time Syndromic Surveillance, England, 2014–15

## Technical Appendix

**Technical Appendix Table.** Mean daily rate/percentage of selected respiratory indicators (over weeks 51–03) for individual winters by age group. Activity during winter 2014–15 is compared to combined mean activity during previous 2 winters and results of Mann Whitney test are presented.\*
